

MUSTAFA PATHARIA

Senior Software Engineer

5+ years of experience in Full-Stack Engineering, specializing in building **multi-tenant SaaS platforms**, **distributed backend systems**, and **AI-driven development workflows** using **Node.js/NestJS**, **Angular**, **Next.js**, **PostgreSQL**, **Redis**, and cloud infrastructure (**AWS/GCP**). Expert in **MCP server development**, **AI agent frameworks**, **microservices architecture**, and **production-ready enterprise applications**.

TECHNICAL SKILLS

Primary Stack Node.js · NestJS · Express.js · PostgreSQL · Redis · AWS · GCP · Docker · REST · GraphQL · Pub/Sub

Languages & Frameworks JavaScript/TypeScript · Python · PHP · Angular · React · Vue.js · Next.js · Laravel · FastAPI

Databases & Cloud PostgreSQL · MySQL · MongoDB · Redis · AWS RDS · Firebase · Supabase · EC2 · Cloud Infrastructure

Architecture & Security Microservices · Multi-tenant Architecture · OAuth · JWT · RBAC/ABAC · Encryption · Audit Logging

Additional Technologies GitHub Copilot · MCP (Model Context Protocol) · Odoo ORM · React Native · Sequelize · WebSockets · gRPC · Tailwind CSS · Bootstrap · Git

EXPERIENCE

KPI | Dubai, UAE | July 2022 – Present

Senior Application Developer (Tech Lead @ [infithra](#))

Tools Used - Node.js, NestJS, Angular, PostgreSQL, Redis, Docker, AWS, GCP, GitHub Copilot, MCP

- Designed complete **multi-tenant HR & Payroll SaaS platform** using **Node.js/NestJS** with **modular architecture** and **reusable components** — built **800+ production APIs** with tenancy isolation, fully **customizable/configurable** via rules compliant with **UAE labor law**
- Built **specialized AI agents** (frontend, backend, debugging workflows), **ProofHub MCP server**, and **design system** with **persistent memory across sessions** — standardized UI/UX guidelines (components, styles, classes) accelerating development velocity and reducing code review time
- Optimized **Docker build times** from **27-30 minutes to 5-8 minutes** using **BuildKit**, **layer caching**, **NGINX base image reuse**, and **node_modules caching** — eliminating redundant installations across deployments
- Implemented **hybrid RBAC+ABAC authorization system** enabling granular access control per resource and custom user-defined access rules

- Managed **6-8 developer team** — established **code review processes**, **unit testing workflows**, and **Git branching strategies**, while conducting comprehensive **code reviews** and mentoring developers on best practices and emerging technologies
- Built fully **automated client provisioning system** reducing onboarding to **~40 seconds** — handles database creation, table setup, function deployment, **data seeding**, default user creation, and **automated notifications** on success/failure

PACE Group | Sharjah, UAE | March 2021 – July 2022

Software Developer (Full Stack)

Tools Used - Vue.js, Laravel, PHP, MySQL, WebSockets, AWS (EC2, SES)

- Developed modular **full-stack applications** using **Vue.js** and **Laravel** with emphasis on code reusability and maintainability
- Implemented **real-time collaboration features** using **WebSockets** enabling live updates across **distributed systems**
- Managed complete **API lifecycle** (design, implementation, testing, deployment, monitoring) ensuring **high availability**
- Deployed applications on **AWS infrastructure** (EC2, SES) with focus on **scalability and reliability**

KEY PROJECTS

ProofHub MCP Server | [Published on Glama](#) **Model Context Protocol** server enabling **AI agents** to interact with **ProofHub** project management platform — task retrieval, commenting, and **workflow automation**

AI Development Workflow System | GitHub Copilot · Custom AI Agents Specialized **AI agent framework** with **sequential task workflows**, **persistent memory** across sessions, and **custom design system** for Infithra project — integrated **GitHub Copilot** with **ProofHub MCP server** for **automated task management**, reducing code review time and token consumption through **graphified analysis**

Odoo-NetSuite Integration | Python · Odoo ORM · REST API Custom **Odoo addon** automating **invoice and payment synchronization** from **Odoo POS** to **NetSuite** based on **configurable mapping rules**

NetSuite Warehouse Inventory App | React Native · NestJS · NetSuite REST API **Mobile inventory management system** with **RFID hardware scanner integration**, **real-time NetSuite sync**, and **NestJS middleware** providing user management and **standardized API layer**

HR & Payroll Management Platform | Node.js · PostgreSQL · Angular **Multi-tenant SaaS** with **UAE payroll compliance**, **attendance tracking**, **leave management**, and **automated statutory calculations** serving **600+ users**

Equipment & Fleet Rental System | Node.js · Vue.js · PostgreSQL **SaaS platform** for rental operations with **GPS tracking**, **dynamic pricing**, **contract management**, and **real-time inventory**

EDUCATION

Bachelor of Engineering in Computer Science | University of Mumbai, Maharashtra, India August 2016
– October 2020 | CGPA: 7.06/10

ADDITIONAL INFORMATION

Languages: English (Fluent), Hindi (Fluent)
